Our Services

We provide a comprehensive suite of tools and information to empower farmers at every stage.

AI Advisory

Get instant answers to your farming queries, powered by advanced AI.

Pest & Disease Detection

Upload a photo of your crop to identify diseases and get treatment advice.

Crop Strategy

Get AI-driven recommendations for the most profitable crops to grow in your area.

Market Information

Access real-time market prices and get AI analysis on market trends.

Weather Forecasting

Get accurate, location-based weather forecasts to plan your activities.

About Agri-Connect

About Agri-Connect

Farmers of Rajasthan

Agri-Connect was forged in the fields of Rajasthan, not in a boardroom. Our journey started by walking alongside farmers, sharing their concerns through more than 10 in-depth interviews with the agricultural communities of Rajasthan. We didn't just collect data; we listened to stories of battling unpredictable monsoons, struggling with arid soil conditions, and fighting the constant war against resilient local pests. These conversations weren't just research; they were our foundation.

Every feature on this platform is an answer to a real problem we heard directly from the farmers of Rajasthan. We are obsessed with translating those on-the-ground challenges into simple, powerful digital tools. Our mission is to put practical, data-driven power into the hands of every farmer, ensuring their hard work leads to a more profitable, sustainable, and secure future.
